Karan kumar gupta

I am a CSE(3rd year) student in MAIT delhi.

I am good learner and hard worker.
My hobby is competitive coding and developing websites.

Skills

node js   html,css and js   python   c++   c   react js

Experience

Web Developer
LetsGrowMore - Internship Aug 21-Sep 21

I developed web applications such as Student Results Management System,Web app which fetches user detail by API and single page website.
We used html,css,js,react js,php and mysql database etc.

Projects

Single page Website

I have created single page website using html,css and js.
It is having smooth scrolling feature,contains several blocks and google maps as well.

Student Results Management System

I have created the student result management system.
In this teacher can declare or update the student results.
Teacher can admit new admin or a student or can update their details.
I used html,css,js,php and mysql database.

Realtime resturant website

I have created a restaurant website using html,css,js and ajax.
It contains menu in different varieties and google maps etc.

Education

bachelors - maharaja agrasen institute of technology - 2023
82% bachelors of technology - computer science engineering

Certifications

Introduction To Machine Learning

This was certification from Duke University on COURSERA.
